EXAMINER'S AMENDMENT

1. This action is responsive to the following communication: The BPAI Decision rendered on 12/02/10.

2. It is noted that the title has been amended in the 02/11/08 Specification amendment as follows:

“METHOD AND DATA PROCESSING SYSTEM FOR PROVIDING AN IMPROVED GRAPHICS DESIGN TOOL”

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Antony P. Ng (Reg. No 43427) on 2/01/11.

The application has been amended as follows:

Claim 16:

A data processing system comprising a processor and a memory having stored thereon a software tool for performing a graphics editing operation on a graphic object in a display of overlapping graphic objects in a data processing system, the software tool being operable to cause control circuitry within said data processing system to:

store a model of a graphic object, wherein said model includes an indication of whether said graphic object is a parent or child of another graphic object;

display a plurality of overlapping graphic objects to a user;

Art Unit: 2179

detect a selection by the user of a graphics editing operation to be performed on a graphic object;

detect a position of a pointer with respect to a display of said plurality of overlapping graphic objects;

display to a user a list of overlapping graphic objects which coincide with said pointer position and on which said graphics editing operation can be performed;

detect a selection by the user of one graphic object of said indicated plurality of overlapping graphic objects as a target graphic object without the user changing said pointer position to make said selection;

perform the graphics manipulation operation on said target graphic object; and

make said target graphic object visible during performance of the graphics editing operation on said target graphic object.

Claim 17:

The ~~software tool~~ data processing system of claim 16, wherein said position of a pointer comprises a user-defined area of said display described by the motion of said pointer in response to said user dragging an input device.

Claim 18:

The ~~software tool~~ data processing system of claim 16, operable to change the form of said pointer on said display in response to detection of said user input selection.

Claim 19:

Art Unit: 2179

The ~~software tool~~ data processing system of claim 16, operable to select a source object and drop said source object onto said target graphic object.

Claim 20:

The ~~software tool~~ data processing system of claim 16, operable to store the positions of said plurality of overlapping graphic objects on said display and compare said pointer position with said graphic object positions to determine which graphic objects are coincident with the pointer.

Claim 21:

The ~~software tool~~ data processing system of claim 16, operable to maintain a record of attributes relating to each of said graphic objects.

Claim 22:

The ~~software tool~~ data processing system of claim 16, operable to continuously display to the user a hover window listing said graphic objects which are coincident with said pointer position and continuously updating said hover window in response to changes in said pointer position.

Claim 23:

The ~~software tool~~ data processing system of claim 16, wherein said graphics editing operation comprises adding text to said target object.

Claim 24:

Art Unit: 2179

The ~~software tool~~ data processing system of claim 23, wherein said graphics editing operation further comprises the steps of:

opening a text box on said target graphic object;

displaying a text insertion cursor in said text box to display the location where new text will be inserted; and

ending said graphic operation in response to the user moving said pointer to a position outside of said text box and depressing a control button on an input device.

Claim 25:

The ~~software tool~~ data processing system of claim 16, operable to determine whether said target graphic object is the outermost one of said graphic objects which are coincident with the position of the pointer.

Claim 26:

The ~~software tool~~ data processing system of claim 24, operable to make at least the outermost one of said coincident graphic objects temporarily transparent.

Claim 27:

The ~~software tool~~ data processing system of claim 26, operable to make said outermost one of the coincident graphic objects reappear automatically after the graphics editing operation has been performed on said target graphic object.

Claim 32 is canceled.

Allowable Subject Matter

4. Claims 1-27 and 30 are allowed.

The following is an examiner's statement of reasons for allowance: Independent claims 1 and 16, when considered as a whole, are allowable over the prior art of record. Specifically, as mentioned in the BPAI Decision rendered on 12/02/2010, the prior art of record fail to clearly teach or fairly suggest the combination of following limitations:

- ❑ displaying to a user a list of overlapping graphic objects which coincide with said pointer position and on which said graphics editing operation can be performed.
- ❑ detecting a selection by the user of one graphic object of said indicated plurality of overlapping graphic objects as a target graphic object without the user changing said pointer position to make said selection.

The dependent claims further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
